

Performance That Improves With Age.

The world of tomorrow is full of uncertainty. Your business, your competition, the economy and certainly computer technology. The AcerPower 486SX personal workstation is one of the safest paths you can take to the future...because Acer is the company behind it.

The AcerPower 486SX offers you today's latest technology with the easiest and least expensive means to future growth. Start with the new Intel486™ SX 20MHz processor whose performance exceeds today's 386DX-33MHz solutions – and whose cost is lower. Then tomorrow, when you need greater performance, upgrade your system to a 486DX-33MHz processor using Acer's

ChipUp™ technology. By adding a CPU chip, not a module. No hardware or software changes. It

can't get any easier or less expensive than this!

But, your growth path isn't limited to the CPU alone. Memory can be expanded to a full 98MB on-board using commercial SIMMs.

How about video? UltraVGA 1024 x 768 x 16 colors. Expandable to 256 colors by adding additional memory.

At a price of \$2,495* the AcerPower 486SX is an exceptional value. We've included MS-DOS® 5.0, Microsoft® Windows™ 3.0 and PS/2®-style mouse. Along with much more to get you started.

The AcerPower 486SX is the smart investment for where you are today and where you need to be tomorrow.

The Acer logo, consisting of the word "Acer" in a blue sans-serif font.
